

JSO Technology LLC Partners with A10 Networks: Will introduce solution at November 17th JSO Power Breakfast.

Wauwatosa based Information Technology Solutions Provider JSO Technology LLC to Offer A10 Networks' Advanced Server Load Balancing and Application Acceleration Solution.

Wauwatosa, WI (www.jsotechnology.com) October 9, 2009: JSO Technology is pleased to announce its partnership with A10 Networks, an industry leader in Load Balancing and Application Acceleration solutions.

JSO President James Oryszczyn comments, "Many of my customers have a need for load balancing and application delivery but are scared off by the high cost of deployment and the continuing costs associated with support. I am partnered with other load balancing solutions, but after having been introduced to the A10 team and seeing their very competitive solution and support pricing, I simply had to move forward with a partnership with A10."

A10 Networks offers three major product series, the AX Series which offers Advance Traffic Management, the EX Series, featuring Bandwidth Management with Identity Reporting and finally, the ID Series, which provides for Network Identity Management. The three solutions can be tied together to provide a truly innovative networking and security solution.

James and the A10 team will be formally kicking off the relationship by hosting an A10 Networks / JSO Power Breakfast, to be held on Tuesday, November 22, 2009 at JSO's office in the Technology Innovation Center Building, located at 10437 Innovation Drive, Conference Room 119, Wauwatosa, WI 53226.

People interested in a presentation of the A10 Networks solution set can register for this event by emailing lars@jsotechnology.com or by calling 414-455-0720. Seating is limited and refreshments will be served.
